

Tri-CBC-ACM Data Use Agreement (DUA)

I request access to the data collected by the **Health Informatics Research Lab (HIRL)**, Department of Computer Science and Enigneering, Daffodil International University, Dhaka, Bangladesh for **Tri-CBC-ACM**, collected in Collaboration with **Dr Debashis Biswas, FCPS (Medicine)**, Jhenaidah Prince Hospital Ltd (JPH), Bangladesh, for scientific investigation, teaching, or planning clinical research studies. By agreeing with this, I agree to the following terms:

1. I will receive access to the data and only use the dataset for **scientific investigation, teaching, or planning clinical research studies**.
2. I will maintain the “**Fair Use Policy**” under “**CC BY-NC-SA 4.0**” and will credit the original Authores by citing the Work.
3. I will not use the data in my names and if there is evidence of dataset plagiarism, I will be liable for every copyright infringement practice. Furthermore, I will not sell, distribute, or sublicense the Data to third parties without written permission. And use the Data for unauthorized purposes. Or attempt to re-identify data that has been de-identified.
4. I will not disclose any participant-level raw or derived datasets beyond the uses outlined in this agreement. Derived datasets containing participant-level data that I create and that I anticipate will benefit the scientific community will be submitted to any repository with proper credits, citations, and steps to reproduce mentioned
5. I will not contact the participants of **HIRL** or **JPH contacts** in case of any performance issues of the data, for example, if the data p[erformed poorly. However, with proper steps to reproduce the problem, an email can be sent to Principal Investigator (PI), **Md. Hasan Imam Bijoy (hasan15-11743@diu.edu.bd)**, not to the **HIRL** or **JPH** participants.
6. I will not modify the values of Feature sets, and in the case of **Simulation, Generation, Optimization, and Feature modification** of the feature values, I will be complying with **WHO** reference values for any **Clinical, Biological, or Lifestyle response** values and **will be liable for any cases of biologically impossible or novel dicoveires and the original authors are not to blame**, and will always provide valid reasons and steps to reproduce for such cases.
7. Furthermore, any help with Datset and Research Collaboration, I will always contact **HIRL** and **Md. Hasan Imam Bijoy** for such. And I will preserve Privacy for every participant in this study and will only share official contacts for collaboration.

The Copyright of the Tri-CBC-ACM dataset is held by Susmoy Biswas (1st) and Md. Hasan Imam Bijoy (PI), HIRL, and Jhenaidah Prince Hospital. By agreeing to the Data Use agreement (DUA) of the Tri-CBC-ACM dataset, I will be responsible for everything done with the data, and the original authors are not to blame. Furthermore, I agree to all of the previous claims stated in the documents and upon breaching them, I will be liable to revoke the permission to us ethe data for any purposes regardless.
